

EDUCATION

Bachelor in Engineering | *Electronics, Communication and Information*
Tribhuvan University, IOE, Pulchowk Campus, Nepal

2019-2024

SKILLS

Technical Skills:

- **Programming:** C, C++, Python and RUST
- **Tools:** Git, Linux, Docker, AWSCLI familiarity
- **Cloud:** Data engineering and ETL pipelines, Microservices
- **Others:** AirFlow, Dockerization Concepts, SQL/NoSQL, DR Strategies, CloudWatch, AWS Well-Architected Framework

Personal Skills

- Teamwork, Collaboration, Leadership and Resource Management skills
- Highly Organized and Disciplined
- Critical Thinking and Problem Solving ability
- Adaptability with working environment and Open Minded

Languages:

- **Nepali**
- **English**

PROJECTS

TheCuestaWebApp | *Full Stack project*

A web application that let bungee jumping service provider uploads the video of the clients and the clients can access them from their profile. Containerized the application in the docker container.

Smart Bot | *RUST*

An Smart Bot which can play 29-Card-Game; Made from scratch while learning RUST; Implemented MCTS algorithm which could play the game with winning strategy.

Dijkstra's Algorithm Visualizer | *C++*

Implemented the concept of Data Structure like Nodes, linked list, Stack, Tree, Map etc in this program.

OCR Using OpenCV and Google's Tesseract API | *C++*

A small tool for optical character recognition; contributed in making environment setup, linking API to the tool and implement OpenCV for image preprocessing.

CERTIFICATION

AWS Solutions Architect – Associate (SAA-C03) Certification | **AWS**

Understood the key system design principles for cost-optimized, scalable, highly available, and secure systems in AWS.

Building Serverless Application in AWS

Learned and implemented the fundamental application of serverless computing.

AWS Data Engineering | **AWS**

Enrolled in Data Engineering Elective course at Pulchowk Campus; Learned to design and implement CI/CD pipelines in AWS; Learned to use various Cloud services and cloud securities tools.

Data Science and AI course Certificate | **Samsung**

Enrolled in a course Data Science and AI program offered by Samsung under Samsung Innovation Campus program; Worked on a deep learning project for deep fake detection

Apache Airflow Essential Training

Implemented ETL with MongoDB cloud; Learned about DAGs and Schedulers and their use cases

Web Programming with Python and JS | **Harvard's CS50**

Worked on various Django + JS web apps projects; Learned to use SQL, mitigate various web vulnerabilities, learned about CI/CD pipelines etc;

Winner of HackaDev 2023 | **NAAMII**

Won the hackathon organized by Diyo-AI in NAAMII: 4th Annual Nepal AI school Fellowship; Designed a platform for delivering the product to customers; Also developed business model

WORK EXPERIENCE

Cloud Apprenticeship|AWS Cloud Computing

2026 Jan–March

TekBay, Lalitpur, Nepal

- Actively shown commitment, professionalism and a strong enthusiasm to work collaborately in a team.

Software QA Automation

June 2024–Present

Cedar Gate Technologies, Nepal site office, Sanepa Lalitpur, Nepal

- Gained hands-on experience in data engineering pipeline orchestration while applying principles of the AWS Well-Architected Framework.
- Actively participated in design, testing, and optimization of ETL pipelines using S3, SQS, Lambda, Step Functions, Snowflake, and EMR for large-scale data processing
- Understood appropriate managed and serverless services based on workloads to improve scalability and reduce operational overhead
- Integrated AWS SDKs with selenium to automate the workflow testing.
- Continuous deployment with Jenkins and Monitored system performance using CloudWatch metrics and Log Insights.
- Learned to backup RDS, take snapshots, raise RDS from snapshots; learned about s3 lifecycle policies and so on
- Gained industry experience of using JIRA and Salesforce.
- Participated in daily scrum meetings and contributed to multiple phases of projects using Agile methodology.

Event Organizer

2023–2024

Locus, IOE, Pulchowk Campus Nepal

- Organized technological events and also instructed in software and hardware fellowship.

Children In Technology | LOCUS 2024 and WorldLink

2023

Conducted internet awareness program in Bagmati and Gandaki Province with involvement of approx. 800 students from grade 9 and 10.

Full Stack Engineer

2021-2023

Melo, Pulchowk, Lalitpur

- Served as a Full Stack Developer, utilizing React and Node.js for frontend and backend development.
- Analyzed business requirements and translated them into technical specifications, using MERN stack
- Adept clean and maintainable code practices.
- Developed RestFul APIs for seamless interaction with applications services and data storage layers.
- Containerized application in docker and also deployed application in CI/CD pipelines for automated applications.
- Adopted TDD practices to enhance reliability and maintainability in backend development.
